Gabriele Canò Cantelmo

Software Engineer — Java & Cloud

Summary

Software Engineer with 8+ years of experience building secure, scalable Java systems for banking and IoT clients, spanning monolith architecture, microservices, and cloud infrastructure on AWS. I've led development teams, owned production systems end-to-end, and driven technical migrations with minimal disruption. I integrate AI tools into my daily workflow to move faster without compromising code quality, and I favor direct communication and Agile delivery.

Technical Skills

Programming Languages	Java (8–25)
Frameworks & Testing	Spring (Boot, Data JPA, Kafka), REST, SOAP WebServices, J2EE, JUnit, Cucumber (BDD)
Databases & Caching	SQL Server, Oracle, DB2, MongoDB, DocumentDB, Ehcache
Cloud (AWS)	AWS SDK, SQS, SNS, SES, EventBridge, EC2, ELB, Auto Scaling, VPC, S3, Secrets Manager, CloudFormation, CloudWatch
Tools	Git, Docker, Kubernetes, Jenkins, GitLab, Jira
AI Tools	GitHub Copilot, Claude, AI-assisted development workflows

Experience

Mar 2025 – Present
Backend & Cloud Engineer, *BBVA (via GFT)*, Spain

Cross-functional engineer on BBVA's Notifications team, owning the system that delivers push, sms, web push, and email notifications to bank employees and customers across multiple internal and external consumers. Responsibilities span development, AWS configuration, and production support:

- Designed and built a dynamic HTML template validation framework by extending OWASP's HTML sanitization policies, overriding default behavior to reject unsafe templates outright rather than silently sanitizing them
- Diagnose and resolve production incidents reported via client tickets
- Configuring a new AWS test environment
- Write and maintain Jenkins CI pipelines and CloudFormation infrastructure templates
- Writing and maintaining Cucumber test suites
- Perform monitoring, sprint task reviews, and code reviews within an Agile/Jira workflow

Jul 2024 – Feb 2025
Java Backend Developer, *Intesa Sanpaolo (via GFT)*, Spain

Recruited by GFT Spain for my Italian language skills to join a GFT Italy-led team building a microservices-based platform for Intesa Sanpaolo's employee credit card management. Developed Java microservices (BE4FE and BE layers), integrating Oracle DB, MongoDB, and Kafka to ensure secure, scalable data exchange.

2020 – Jun 2024 **Java Backend Developer / Team Leader**, *Italgas (via Atos)*, Italy

Deployed by Atos to Italgas, where I grew from developer to team leader on a monolithic IoT platform. Deep ownership of the codebase let me architect and implement solutions independently.

- Led a small team of junior developers
- Architected and implemented core application features and both relational and non-relational data structures for an IoT platform
- Drove the migration from Java 8 to Java 17 and Spring Boot 2.1 to 2.7 across the platform, updating dependencies and GitLab CI pipelines with minimal production downtime
- Began shifting the codebase from a monolithic structure toward a more service-oriented approach
- Implemented REST and SOAP APIs to support integrations across containerized and IoT systems

2018 – 2020 **Java Trainer**, *Begear*, Italy

Transitioned from student to instructor, designing and delivering hands-on courses on Java fundamentals, best practices, and Spring Boot. Built my communication and mentoring skills by guiding students through coding exercises and group projects.

2009 – 2014 **Software Developer**, *GM Italia*, Italy

Sole developer at the company, building and maintaining a sales-support system (on the Diapason ERP platform) that generated product labels and automatically updated warehouse inventory upon each sofa order, removing the raw materials consumed in production. Also served as the primary point of contact for IT support and network infrastructure.

Education

Computer Science studies (not completed), *Università degli Studi di Napoli Parthenope*, Napoli - Italy

High School Diploma in Information Technology, *I.T.I.A. Manzoni*, Napoli - Italy

Languages

Italian Native

English B2/C1 (in progress)

Spanish B2

Courses & Certifications

2026 **AWS Certified Solutions Architect – Associate (SAA-C03)**, *Amazon Web Services*

2026 **AWS Certified Cloud Practitioner**, *Amazon Web Services*

2026 **Business English (in-person course)**, *yourenglish.ie*, Dublin - Ireland

2024 **DevOps & Cloud Engineer**, *Tag Academy*

2024 **Apache Kafka for Spring Developers**, *Coursera*

2023 **IBM DevOps & Software Engineering**, *Coursera*

2020 **Spring Boot Developer**, *Coursera*

2018 **Java Developer**, *Begear*

Personal Projects

P2P Blockchain in Java — Built a peer-to-peer blockchain from scratch in Java at a Napoli Blockchain community event, reimplementing core Bitcoin concepts: UTXO-based transaction model, SHA256withECDSA digital signatures (BouncyCastle), Proof-of-Work consensus, and P2P networking with node discovery.
